Provider Benefits Guide

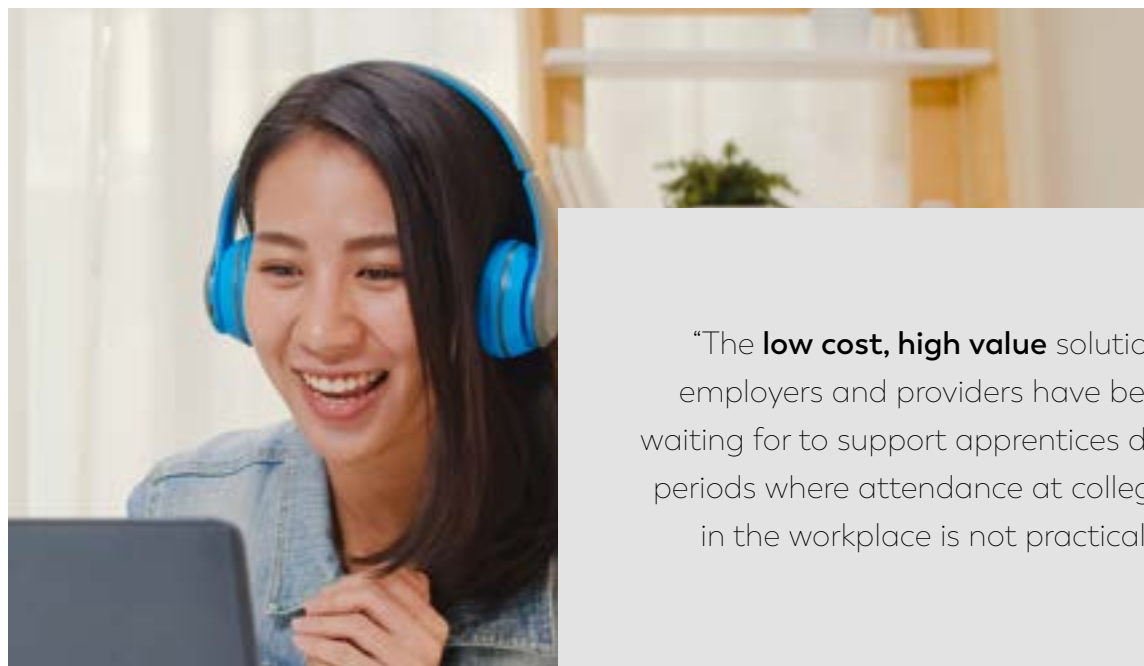

Thank you for your interest in using the Impact AiM product range to support your Apprentices.

We have introduced our upgraded range with a focus on creating valuable, cost effective delivery support to providers, and apprenticeship learning modules and tasks, that ensure they are ready and prepared for the workplace.

Choose the Impact AiM package that matches your budget. Each will add value to your provision, meet the demands of employers and government regulatory bodies and include up to 120 hours of trackable 'Off the Job' training hours

The 'Added Value' benefits of registering your apprentices and students with Impact AiM include:

- Savings on staff time and costs
- Learning can continue for up to 8 weeks during Programme Break periods (Covid lockdown)
- Up to 120 hours fully trackable 'Off the Job' training
- Mentor Support and User Guides for each module
- Weekly updated sector specific learning modules
- Individual development plans
- SMT - Board monthly webinar programme
- Personal Profile Assessments
- SMT High Performance Trait Indicators
- Optional Mentoring Qualifications
- Programme modules cover all the EIF Behaviour, Attitudes and Personal Development requirements.
- Fully deliverable either in person or online.
- Great cost savings for providers and employers freeing up time and levy money for other delivery requirements.

"The **low cost, high value** solution employers and providers have been waiting for to support apprentices during periods where attendance at college or in the workplace is not practical."

Choose one of our three packs

01 OPTION

FREE RESOURCE START UP PACK.

This is our Foundation Free Resource Pack but also High Value. Unlike many other free courses, it provides a deep insight across a range of topics that lead individuals and organisations towards a strategy of lifelong learning and organisational growth built on a simple philosophy that is always evolving.

02 OPTION

CPD WORK OUT PROGRAMME AND CPD +

This programmes offers a big slice of added value and we can also adapt the learning outcomes for funded programmes such as Traineeships, Adult Education and Kickstarters.

The extension to the Apprenticeship and Mentoring start up is designed to increase total off the job training hours to 120 across 6- 12 months and introduces contextualised learning modules that reflect different sectors, age ranges of employees and academic levels. All options available at a price of just £10 per apprentice per month - minimum three months,

The feedback we have received on our CPD Work Out programme is that it is a game-changer in the delivery of training in the workplace or college. It provides exactly the support needed for people, young or old to be ready for the workplace. We believe it is the low cost, high value solution industries have been waiting for to fully commit to training tomorrow's workforce today.

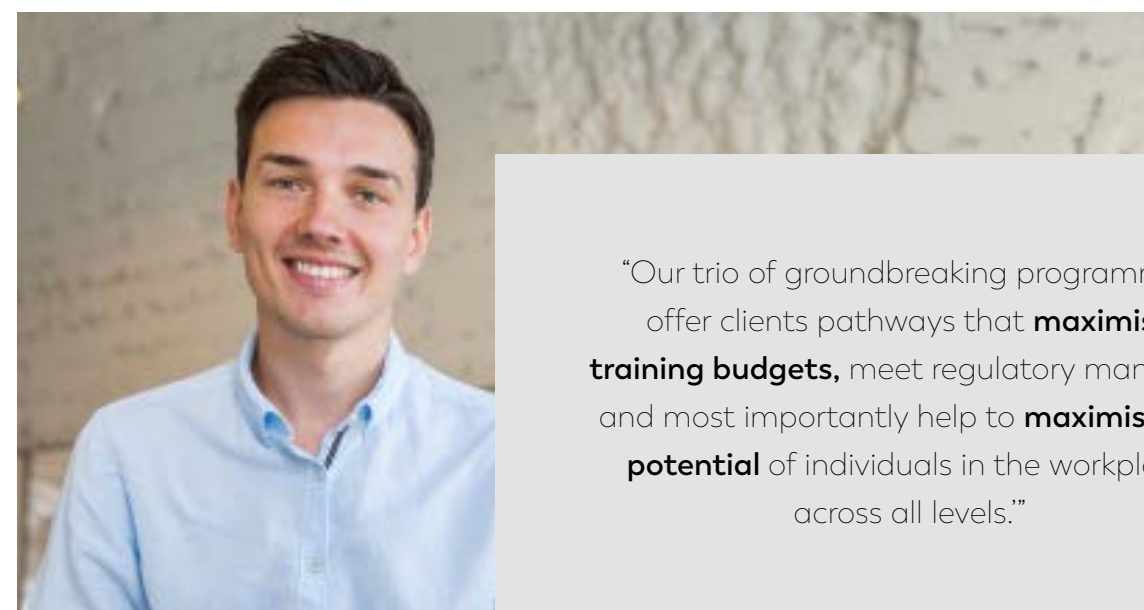

03 OPTION

We passionately support the view that blended learning and programme of vocational and academic in person and online are the future.

The events of 2020 have accelerated the transition towards these strategies. Yet many business owners, board of directors and senior management teams remain uncertain about how this change can be implemented so that it impacts the values of their businesses and the 'bottom line'.

Our solution had been to create Impact AiM All in Access' as a top to bottom strategy that also enables bottom to top influence. We believe that organisations that work in silos will struggle to deal with the pace of change in both the commercial and public sector. Our AiM is to support our clients to build training programmes that integrate all parts of the organisation.
